

STONEGREEN

MAXIMUM RETURNS
FROM REAL ESTATE
THROUGH SMART MONITORING
AND OPTIMIZATION

YOUR PARTNER

WHO ARE WE?

We are a real estate management team that maximizes returns from real estate through asset monitoring and sustainability improvements.

ENERGY MONITORING

ALWAYS INSIGHTFUL

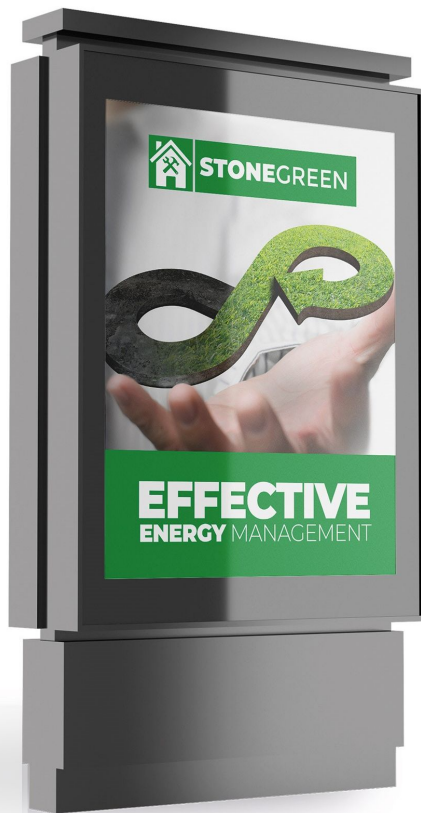

There is a wealth of energy and climate data available within real estate properties, where multiple service providers and contractors deliver their expertise. Stonegreen presents this data objectively in a clear dashboard, making it easy to generate reports.

This makes compliance with the Energy Saving Obligation (EBS) simple.

DID YOU KNOW?

... we can also provide temporary monitoring of climate and energy data?

**AVAILABLE
EVERYWHERE**

AT THE BUS STOP

Let's pause for a moment!

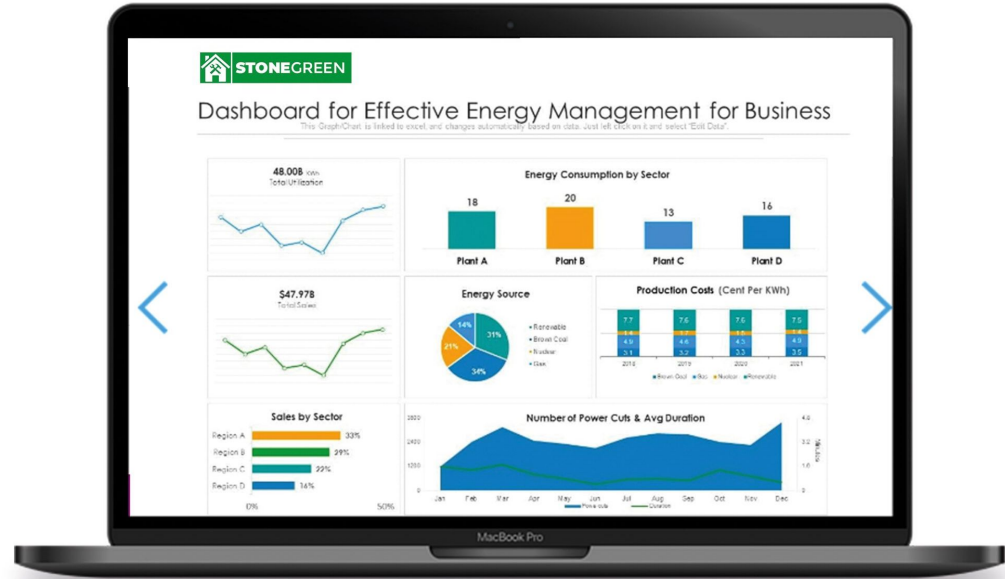

Insight and maximum returns are achievable. At which location will we stop to make it happen?

It can be anywhere in Europe.

ENERGY MONITORING

ON YOUR LAPTOP

Partnering with installation partners to use knowledge and data effectively, reducing management and maintenance costs.

OUR STORY

THE ORIGIN

We have developed an independent model to provide property owners and/or managers with brand-independent information.

All parties within the real estate sector remain within their area of expertise.

STEP 1

We provide initial advice and map out the technical assets.

STEP 2

We begin with monitoring and analyze the objective data.

STEP 3

We replace the technical assets based on the facts and begin optimizing with the chosen installation partner.
